

MTS
Drainage Solutions Ltd

Dear Sir or Madam

Please accept this letter as an initial introduction to our company MTS Drainage Solutions Ltd having been established in Glasgow and Ayrshire areas providing a wide range of drainage related services to a variety of clients we feel that our services will be of benefit to you and are looking to receiving the relevant paperwork to becoming an approved contractor to allow us to carry out any works required by yourselves

I previously worked with Mitchell Drainage for 17 years I worked as a Drainage Engineer for 9 years and as a Manager for 8 during my time at Mitchell I was instrumental in solving and fixing a wide range of Drainage Problems some of which were for Charing Cross Housing Association over the years I built up a good reputation of solving drainage problems and have a good knowledge of all aspects of drainage

We are in the process of becoming Construction Line and CHAS verified and all our operators have Association of High Pressure Water Jetting certificates

Recently we have just carried out excavation works and fixed a drain that was full of roots that another drainage company failed to trace and locate we solved this problem within 2 hours of arriving on site

We currently have a fully trained workforce and are in the process of becoming CHAS and Construction Line approved contractors and presently we are working with Parkhead HA, New Gorbals HA Knowes HA and other Housing Associations as well as construction firms the all staff are confined space trained and hold a current CSCS Cards A variety of other certificates are held individually covering various aspects of our works. We have a full complement of Method Statements and Risk Assessments covering our 'standard' works, out with this they are written specifically when required.

We are constantly upgrading our vehicles, equipment and technology to ensure they are in line with the most up-to-date advancement by regularly monitoring the market to see what is available. One of our most significant changes is in our CCTV Survey Reporting Systems, which allows us to provide a schematic of the pipe and still photographs at any point.

Yours Sincerely

Gerry Matthews

Director
